SEED ROUND · 2024

Forge AI

Build. Ship. Scale. With AI.

The AI-powered platform that turns any idea into a production-ready full-stack web application.

```
$ forge new my-saas-app

✓ Analyzing prompt...

✓ Generating React components...

✓ Setting up Supabase backend...

✓ Configuring authentication...

✓ Building production bundle...

✓ Deploying to Vercel...

🚀 Live at: my-saas.vercel.app

⏱  Total time: 47 seconds
```

The Problem

Building software is broken. The gap between idea and product has never been larger.

$150–$300/hr

Developer Costs Are Prohibitive

Hiring engineers to build an MVP costs $50K–$200K. Most founders can't afford it.

6–18 Months

Time-to-Market Is Too Slow

By the time a dev team ships v1, competitors have already captured the market.

71% of Ideas

Never Get Built

Non-technical founders can't execute their vision. No-code tools hit a ceiling fast.

90% Churn

No-Code Hits a Wall

Existing tools (Bubble, Webflow) lack the flexibility to build real production apps.

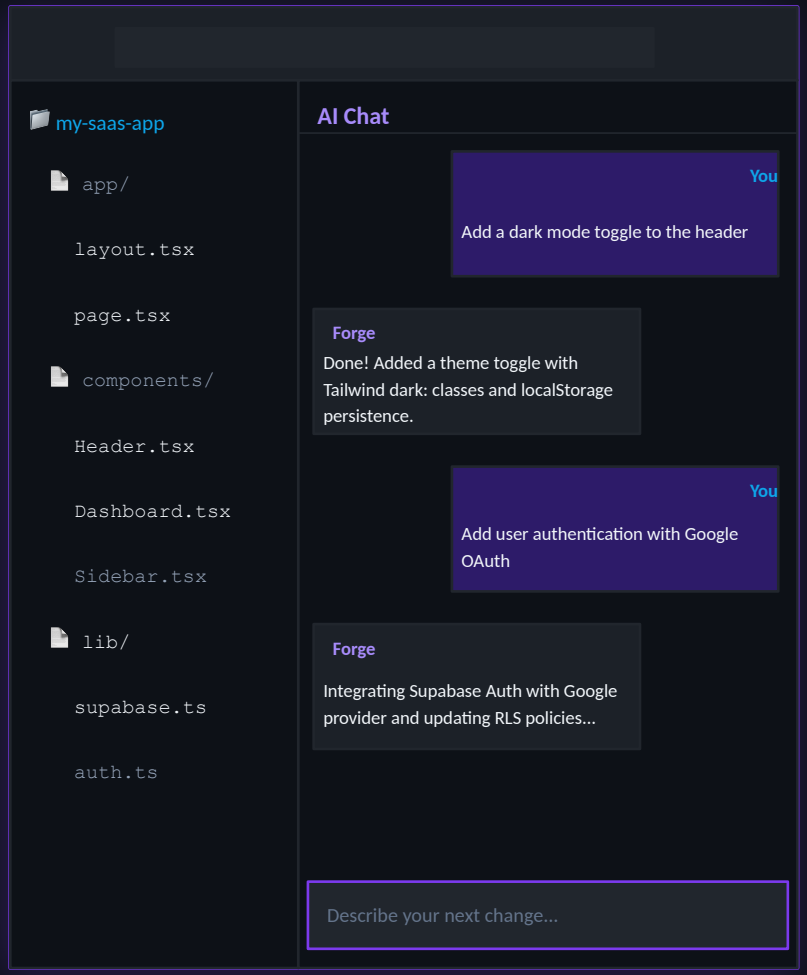
The Solution

FORGE AI PLATFORM

Describe your app. Forge AI builds it complete, deployed, and live in production.

- 🤖 AI Code Generation
- ⚡ Live Preview
- 🚀 1-Click Deploy
- 🔗 GitHub Sync
- 🗄️ Supabase Backend
- 👥 Team Collab

> *"I described my SaaS idea on Monday.*
> *Forge deployed it to production by Tuesday.*
> *This is magic."*
>
> — Beta User, Indie Hacker



How It Works

From idea to deployed app in under 60 seconds — no code required.

01 💬

Describe Your App

Type (or speak) what you want to build in plain English. Include features, styling, integrations — anything.

"Build me a SaaS dashboard with user auth, Stripe billing, and a data table showing subscription analytics"

02 ⚡

AI Builds It Live

Forge AI generates your full-stack app in real-time. Watch files appear, code compile, and your app boot in the browser.

React + TypeScript + TailwindCSS + Supabase + Stripe — all wired up and working.

03 🔄

Iterate with Chat

Refine your app conversationally. "Add dark mode", "Fix the mobile layout", "Add a chart to the dashboard".

Every change is instant. No rebuilds, no deployment friction, no waiting.

04 🚀

Ship to Production

One click deploys to Vercel, Netlify, or Cloudflare. GitHub sync included. Custom domain in minutes.

Your app is live, indexed, SSL-secured, and scalable from day one.

Market Opportunity

We are entering a market at the intersection of three massive, converging trends.

TAM **$650B**

Global Software Development Market

SAM **$180B**

Web Application Development Segment

SOM **$3B**

AI Coding Tools · 35% CAGR

🚀 AI coding tools market growing at 35% CAGR — reaching $12B by 2027

Platform Features

Everything developers need — and nothing they don't.

AI Code Generation

Core

Claude 3.5 Sonnet generates full-stack React/Next.js apps. Context-aware, diff-based updates — not full rewrites.

Instant Live Preview

Core

WebContainers run your app entirely in the browser. Zero server cold starts. Hot reload in <500ms.

Iterative AI Chat

Core

Refine your app through conversation. The AI understands your entire codebase and builds on previous context.

1-Click Deploy

Deploy

Push to Vercel, Netlify, or Cloudflare Pages instantly. Custom domains, SSL, and CDN included automatically.

GitHub Sync

DevEx

Two-way GitHub integration. Push, pull, branch, and PR — your Forge app IS a real Git repository.

Supabase Backend

Backend

One-click database, auth, and storage. AI generates schema, RLS policies, and typed API clients automatically.

Team Collaboration

Team

Real-time multi-cursor editing, comments, activity feed, and role-based permissions for your whole team.

Template Marketplace

Growth

100+ production-quality starters: SaaS, e-commerce, dashboard, blog, landing page — all customizable by AI.

Analytics & Monitoring

Pro

Built-in error tracking, performance monitoring, and usage analytics. Know what's broken before users do.

Business Model

SaaS subscription + usage-based pricing. Simple, predictable, scalable.

Competitive Landscape

We compete on breadth, quality, and speed — and we win on all three.

Company	AI Quality	Preview Speed	Deploy	Collaboration	Backend	Price
Forge AI ⚡	★★★★★	★★★★★	★★★★★	★★★★★	★★★★★	★★★
Lovable	★★★★	★★★	★★★	★★	★★★	★★★
Bolt.new	★★★	★★★★★	★★★	★★	★★	★★★
v0 (Vercel)	★★★	★★★	★★	★★	★	★★★★
Replit	★★★	★★	★★★	★★★	★★	★★★
Cursor	★★★★	N/A	N/A	★	★	★★★

🏆 **Our Moat:** ✓ Proprietary context engine ✓ AI error recovery loop ✓ Fine-tuned on 10K+ apps ✓ Fastest preview (WebContainers) ✓ Best backend integration

Technology & Moat

Built on best-in-class infrastructure with proprietary AI systems that compound over time.

AI Layer	• Anthropic Claude 3.5 • Proprietary Fine-tune	• OpenAI GPT-4o • Context Manager
Execution	• WebContainers API • Hot Reload Engine	• Docker Sandboxes • Error Recovery AI
Backend	• Node.js + Fastify • S3 Storage	• PostgreSQL + Redis • Supabase Integration
Infrastructure	• AWS + Cloudflare • Datadog + Sentry	• GitHub Actions CI/CD • 99.9% SLA

Technical Moat

🧠 **Proprietary Context Engine**

AI understands full project state across 100+ files. Diff-based updates — not full rewrites.

🔄 **AI Error Recovery Loop**

Autonomous generate → run → error → fix cycles. Produces working code, not broken drafts.

📊 **Fine-tuned Models**

Trained on 10,000+ production app codebases. Better React, better TypeScript, better architecture.

⚡ **Data Flywheel**

Every app built improves our models. Network effects create a compounding quality advantage.

Go-to-Market Strategy

Product-Led Growth as the engine, community as the multiplier.

Phase 1

Launch (M1–3)

- → Product Hunt #1 launch
- → HackerNews Show HN
- → Twitter/X viral demo
- → YC Startup School

🎯 1,000 beta users

Phase 2

Growth (M4–6)

- → Creator dev partnerships
- → YouTube tutorial SEO
- → Discord community
- → Supabase / Vercel co-marketing

🎯 5,000 paid users

Phase 3

Scale (M7–12)

- → Google Ads (CAC <$150)
- → Template marketplace virality
- → Agency partner program
- → API developer ecosystem

🎯 30,000 total users

PLG Flywheel: Free User Signs Up → Builds First App → Shares App URL → Friends Sign Up → Paid Conversion → Refers Colleagues

Traction & Roadmap

Early signals are strong. We're ready to scale.

Product Roadmap

Q1 2024

MVP Launch

- AI → React app
- WebContainer preview
- Vercel deploy
- Free + 1 paid tier

Q2 2024

Integrations

- GitHub sync
- Supabase backend
- 20+ templates
- Team invites

Q3 2024

Scale

- Real-time collab
- Template marketplace
- Image→App AI
- Mobile preview

Q4 2024

Enterprise

- SSO / SAML
- API access
- White-label
- On-premise

The Team

World-class team with deep expertise in AI, developer tools, and product-led growth.
